

Transport for NSW Roads and Maritime Services Sydney Trains

Transport for NSW (TfNSW) & Sydney Trains are operating agencies under the transport cluster of the NSW Government. Established with the goal to deliver a safe, integrated and efficient transport system across NSW along with making NSW a better place to live, work and visit. METRA Australia partnered with TfNSW Roads & Maritime Services Sydney Trains and delivered a personal storage system that satisfies the needs of their staff.

End-Of-Trip-Facilities (EOTF)

To complement the different buildings and interior aesthetics our team designed and installed clean-lined personal locker storage in selected colours and finishes to suit the space. Each locker was fitted with our patented electronic locks (hard-wired, no batteries) and staff can access assigned lockers via RFID media at a Central Reader Terminal located within the locker banks.

Staff were offered the option of a pre-assigned personal storage locker or could self-assign in the End-Of-Trip-Facilities (EOTF) via a METRA Touchscreen Terminal. Our integrated back office METRA ELS software solution meant staff were able to use their existing media card for building access and EOTF locker access.

Our class-leading electronic locks and locking system was designed and installed across 10,000 lockers over more than 30 individual floors, located in over 14 separate sites throughout NSW.
