

Transport for NSW Roads and Maritime Services Sydney Trains

Transport for NSW (TfNSW) & Sydney Trains are operating agencies under the transport cluster of the NSW Government. Established with the goal to deliver a safe, integrated and efficient transport system across NSW along with making NSW a better place to live, work and visit.

METRA Australia partnered with TfNSW Roads & Maritime Services Sydney Trains and delivered a personal storage system that satisfies the needs of their staff.

End-Of-Trip-Facilities (EOTF)

Our innovative solution offers staff an assigned locker/s that can be accessed from a central reader terminal located within the locker banks, and only require using a single employee access card.

Our class-leading locking system was designed and installed across 10,000 lockers over more than 30 individual floors, located in over 14 separate sites throughout NSW.

METRA Australia's integration solution meant staff were able to use their single card for building access and End-Of-Trip-Facilities (EOTF) locker access. Staff were offered the option of an assigned personal storage locker that was accessible from central reader terminals located within the locker banks or self-assign in the EOTF through a Touch Screen.
