

## Honeywell - Abbotsford, VIC

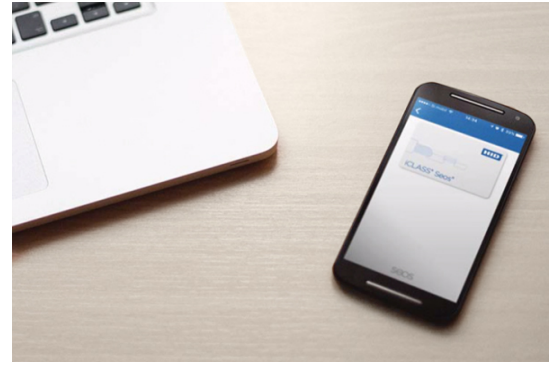

Honeywell is a global software-industrial company that delivers technology solutions to business, industry and consumers. As a diversified technology and manufacturing leader they serve customers with aerospace products and services, control technologies for buildings and industrial, automotive products and specialty materials.

METRA Australia along with partners, Zenith, were engaged to design and supply secure personal locker storage for staff located at the offices in Abbotsford, VIC.

**ZENITH** /

## Secure workplace solution

Our team's intelligent and flexible solution included integrating robust laminate lockers from Zenith in a style to suit and enhance the office setting. Each locker was fitted with our patented hardwired (no batteries) METRA electronic lock with RFID proximity access.

Staff can access assigned lockers with their smartphone (and selected smart watches) using the HID Mobile Access app (available on iOS and Android) via secure (encrypted) HID Seos® credential technology. A central Display RFID panel communicates locker signal functions (lock/unlock) and is back office coordinated with MyMetraLockers (MML) management software.
