

Ian Thorpe Aquatic Centre (ITAC) – Ultimo, NSW

The Ian Thorpe Aquatic Centre, named in recognition of the Olympic swimming champion, is a fitness centre in Ultimo, New South Wales. A stunning feature of the impressive building is the wave shaped roof structure that recalls the character of Darling Harbour. Inside are three swimming pools and extensive exercise and leisure facilities.

METRA Australia designed and installed High-Pressure Laminate (HPL) personal lockers, securely accessed via METRA Kiosk Touchscreen and central RFID Reader Terminal. Patrons and staff can also enjoy the convenience of payWave® cashless payments for locker rental.

Secure, smart and convenient

Our durable High-Pressure Laminate (HPL) lockers feature a one-piece hinge, self-closing doors and offer corrosion-resistant and water-proof properties – backed with a 10-year warranty. Our team customised the lockers visual style to align with the building aesthetic so they make a great impression and accentuate the space.

Each locker door was designed clean lined – no handles or individual RFID readers on the front of the doors.

Each locker was fitted with our patented hardwired (no batteries) METRA electronic lock – built to work consistently and reliably in challenging cold and hot/humid weather environments.

Members, staff and casual patrons can access personal storage lockers via central RFID Reader Terminal and our METRA Kiosk Touchscreen – back office managed with METRA ELS software.

For added convenience we also integrated cashless payments via payWave® terminal built into the central cabinet.
