

# Smart Parcel Lockers

24/7 delivery and collection solution

# METRA Australia has designed a secure and reliable solution to specifically automate parcel delivery and collection processes.

With METRA Australia's smart parcel locker solution, couriers choose a suitable locker size and enter an assigned locker number based on recipient delivery instructions. **No courier-based delivery software or system required.**

Once the locker door is closed an email is instantly sent to notify a recipient when their package is available for easy, secure and discrete 24/7 collection. Recipients then access the locker via PIN code supplied in the email.

## Secure features

- RFID Master cards that open any locker or group of lockers (defined by METRA Australia's delivery software).
- Remote opening of any locker by Administrator.
- Alarm for attempted locker break-in.
- Data event logging (locking, unlocking and alarm) for individual lockers.
- Packages left in the lockers over a specific time period, can be collected with a special RFID Master card.
- Once a package is collected or the locker is opened with the Master card, the credentials previously emailed are also cancelled.

## How it works

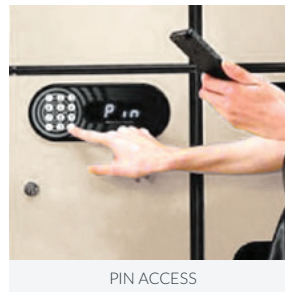

COURIER OR STAFF DELIVER TO ASSIGNED OR DESIGNATED LOCKER

EMAIL SENT AUTOMATICALLY WITH LOCKER ACCESS DETAILS

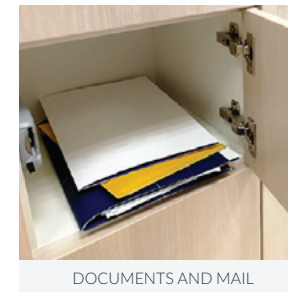

SECURE, DISCRETE AND CONVENIENT 24/7 COLLECTION

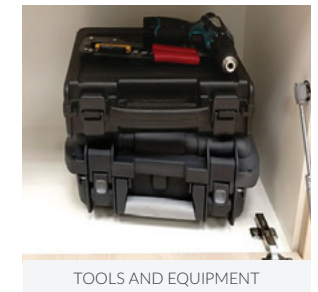

PIN ACCESS

PARCELS AND PACKAGES

DOCUMENTS AND MAIL

TOOLS AND EQUIPMENT

Our smart parcel lockers solution offers secure convenience for delivery and collection of online orders, parcels, mail, dry cleaning, tools and equipment and more.
