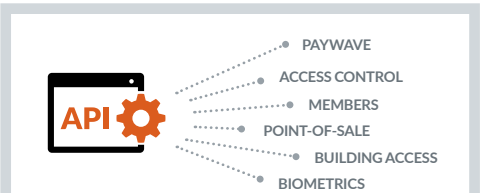
WHO IS WATCHING YOUR CHILD?

With constant innovation at our core, we strive to design and develop the very best materials and technology.



MetraAus API
Our API integration offers the ability to control your locker system through your security software.

Electronic Locking

Enhance security and efficiency with our reliable and durable electronic locks. Our patented designed electronic locks are hard-wired so no batteries are required. Offering secure RFID proximity media access to suit business, education and government demands.

Reader Terminals

Select from our range of comprehensive and flexible access terminals; Central RFID reader terminal with combination keypad or 4 digit LED display, or our advanced METRA Touchscreen with RFID reader and barcode reader, available with your brand design.

Access Control

Our comprehensive Access Control solutions offers you flexibility, security and reliability to manage individual lockers and restrict access on a per customer basis. Includes electronic locking, cashless vending and third-party component integration.

Self-service Kiosks

Make transactions fast and simple with our self-service METRA Touchscreen Kiosks. Available with RFID reader, barcode reader, cashless payWave® terminal, and with your brand design. Improve customer experience and convenience with casual locker rentals and more.

RFID technology has reshaped convenience with faster, automated processes, instant application data and analytics.

Extend existing HID™ identity technology

Breakthrough credential technology

As a HID Technology Partner we offer genuine HID™ Technology solutions for different HID access control platforms. Best of all our kiosks and lockers can be integrated with the HID iCLASS Seos™ platform, offering users access privileges to unlock/lock secure locker storage units with HID iCLASS Seos™ access cards or HID Mobile Access app.

24/7 delivery and collection solution

Automate parcel delivery and collection

Couriers choose a suitable locker size and enter an assigned locker number based on recipient delivery instructions. No courier-based delivery software or system required. Once the locker door is closed an email notification is instantly sent. The package is then available for easy, secure and discrete 24/7 collection. Access to the locker is via PIN code supplied in the email.

payWave® integration

Convenient cashless payments
Streamline operations and enhance customer satisfaction with payWave® cashless payment terminals. Our secure locker rental solution allows multiple cashless payment methods, including contact, contactless and swipe transactions with credit cards and debit cards, key fobs, smart cards, or other RFID enabled devices, such as smartphones.

MyMetraKey™ App

Transforming locker management
With the MyMetraKey™ (MMK) App users can remotely open their individual storage locker or manage locker usage, all via a smartphone*. The app uses your cellular or Wi-Fi connection to gain access and perform various actions.

MyMetraKey app is available for:

Modern designs, finishes and materials
tailored for sports, leisure and aquatic
centres to workplaces, commercial
and government environments.

High-Pressure Laminate (HPL) storage lockers

We are the only company in Australia that offers lockers made entirely from High-Pressure Laminate (HPL). HPL has corrosion and water-resistant properties making it very versatile and ideal for high moisture environments such as swimming centres, health clubs and change rooms. Combined with our full length aluminium hinge ensures no part of the complete locker construction is susceptible to rust. Due to HPL structural stability lockers can be designed and installed in a range of vertical and horizontal configurations.
