DELIVERY/PICK-UP AUTOMATION

Reducing delivery costs and providing a 24/7 pick-up for customers

METRA
AUSTRALIA

REDUCE COSTS

Delivery costs are regarded today as one of the leading revenue reducing considerations, especially for products or services sold online.

UK retailers are losing over €300 million per year delivering goods to customer's doorsteps. Add to that the cost of re-deliveries. Meanwhile US retailers are recording that 44% of web purchases are cancelled due to customers thinking the delivery costs are too high.

METRA offers an electronic locking system, designed specifically to automate delivery and pick-up processes. Our delivery & pick-up solution can be used for groceries, parcels, company mail, dry cleaning or other retail or business purpose lockers.

Our solution aims to save time and money compared 'to doorstep' delivery.

METRA delivery & pick-up solution can significantly optimise and reduce associated running costs such as; delivery, staffing, and warehousing.

PO Box 531, Moonee Ponds, Victoria, Australia 3039   www.metraaus.com.au   **1300 METRA AUS**

24/7/365 PICKUP

METRA delivery & pick-up solution sends an instant SMS or email to notify a recipient when their package is available for easy, secure and discrete 24/7 pick-up.

RFID media (employee card), QR code and PIN code can be used as a locker key. If lockers are located in locked premises an RFID media or PIN code is also be used as a door key.
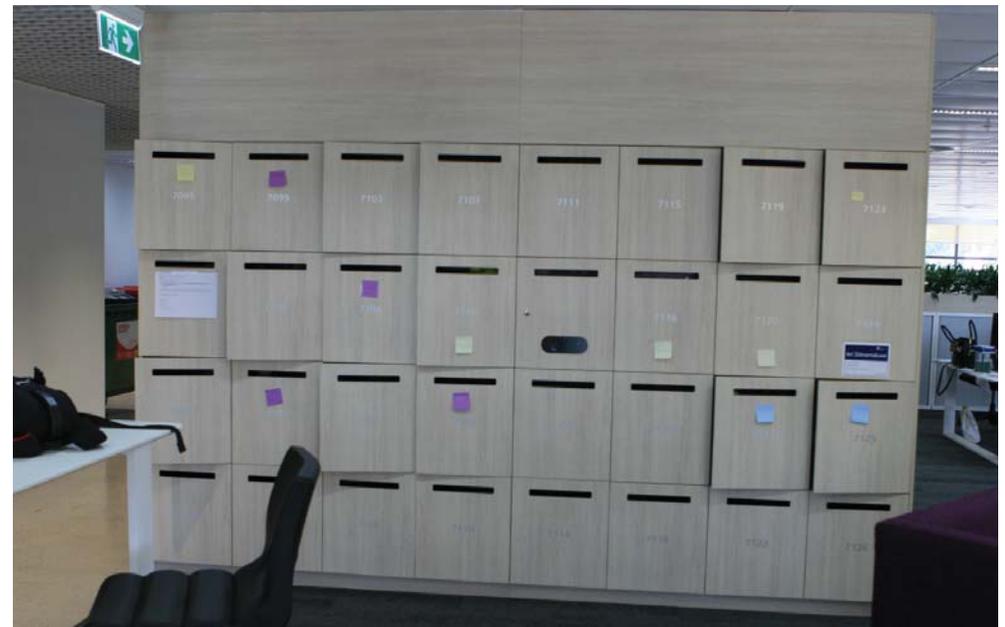

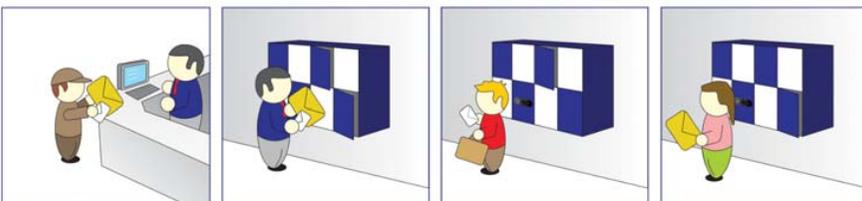

Packages left in the lockers over a specific time period, can be collected with a special RFID Master key.

INTEGRATION OPTIONS

METRA delivery & pick-up solution is offered as a partial integration or a complete solution, depending on your needs and IT resources.
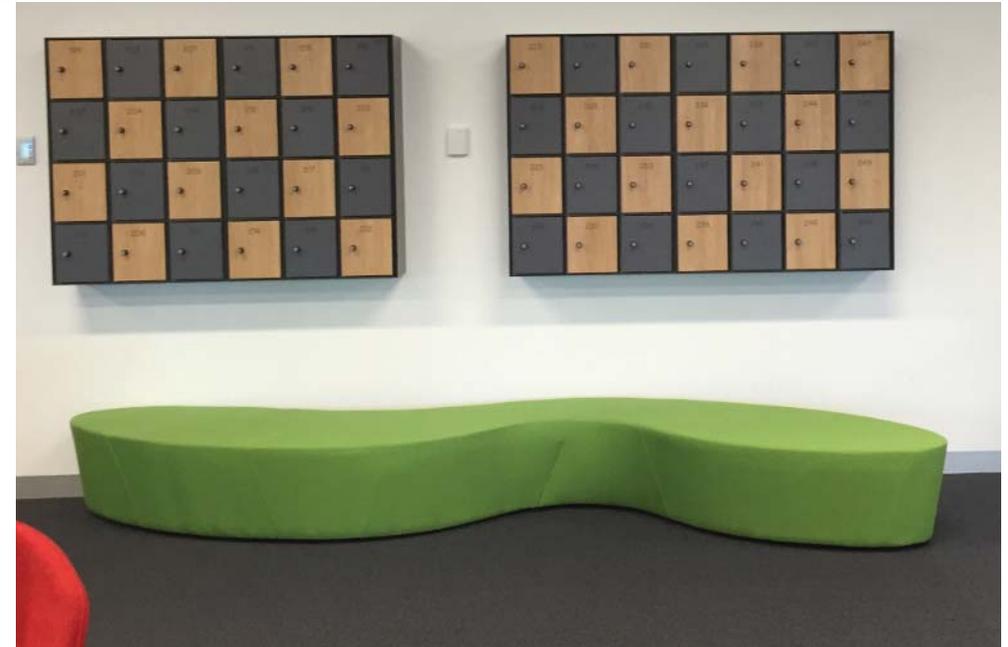

THIRD-PARTY INTEGRATION

Partial integration means METRA delivery locking components can be integrated with third-party software with advanced delivery management options and pick-up communication.

COMPLETE SOLUTION

A complete METRA delivery & pick-up solution provides a comprehensive locking platform in combination with METRA delivery software, offering delivery and communication options.

A complete solution suits companies and organisations that do not need advanced or additional delivery and pick-up functionalities for their solution.

SECURITY FEATURES

METRA delivery software provides the following security features for delivery locker usage:

- Master keys that open any locker or group of lockers (options can be defined in the METRA delivery software).

- Remote opening of any locker by Administrator.

- Alarm for attempted locker break-in.

- Data logging of all events (locking, unlocking and alarm) for each individual locker.

METRA Access Control can be added to provide increased security for locker access. Access Control only allows users with received package or assigned locker details to access locker area or locker room.

Once a package is collected or the locker cancelled, access rights for that particular user are also cancelled.
